Government's New Scheme

Wounded Soldiers in Training. Allowances For The
Men and Their Families.

The Canadians are absolutely unan-
imous about one thing in this war—that
justice and reparation must be secured
for those who have suffered. The men
who have volunteered to fight for us,
while we have stayed safely at home—
these men, coming back shattered and
torn, or with health in many ways im-
paired by their service, must have repara-
tion and from us.

It is the first word of justice; and there
is no Canadian worthy of the name who
will not agree to it with all his heart.

Our hand as well as our heart, how-
ever, must be employed to devise a form
of reparation that will really repair,
that will as far as possible make up to
these men what they have lost.

From the beginning of the war it was
recognized that a man offering his body
to defend our cause should have compen-
sation for any injury his body might
suffer in the carrying out of that task. A
scale of pensions was adopted, both for
disabled soldiers and for their dependants,
in proportion to the degree of disability.
A revised scale involving a large increase
of expenditure, was lately agreed to by a
Parliamentary Committee and is already
in force.

A pension alone, however, will not re-
store the injured man to his place as an
active and useful member of the commu-
nity; and that is got to be done, by some
means or other, both in the community's
interest and in his own.

A very few of the injured will be found
so totally helpless that this restoration is
impossible. On the other hand, judging
by our experience so far, a large major-
ity, in spite of their injuries, will be fit
for their former work. But be-
tween these two classes will be many
men with injuries either handicapping
them seriously in their old occupations
or barring them out altogether.

Such men must not be condemned to
perpetual idleness. They would not
thank us for that. They are not the
backboneless kind, or they would hardly
have thrown themselves into the war.
They did not mistake the cost of their ac-
tion, and they will not want to be ed-
dled and spoon-fed now. Having re-
covered their strength, they will naturally
expect to use it. The question simply is—
how?

To begin with, the disability can often
be lessened by what is called "functional
re-education." By special exercises,
with or without the aid of the ingenious
apparatus invented for the purpose, the
muscles mutilated by wounds and opera-
tions, and weakened by compulsory dis-
ease, can recover some of their strength
and become once more accustomed to
exertion. Then, by "vocational re-
education," the men can be enabled to re-
turn to their original trade; or, when that
is impossible or undesirable, they can be
helped to fit themselves for another oc-
cupation. There is no intention, by the
way, to provide re-education for men
who do not need it.

The Parliamentary Committee decided
that the cost not only of pensions and
artificial limbs but also of this vocational
training should be paid by the Dominion
Government.

The Military Hospitals and Convales-
cent Homes Commission, with Sir James
Lougheed at its head, has taken steps to
organize the training required in many
parts of the country. The complete
establishment of the system may be ex-
pected very soon; for the Government, by
Order-in-Council, has just adopted a re-
port of the Military Hospital Commis-
sion, of which we are enabled to give this
summary:—

The report begins by explaining that
the Commission aims at benefiting not
only disabled members of the Canadian
Expeditionary Force but also disabled
Reservists of the Allied armies who were
longer held residents of Canada when the
war broke out.

The Commission has received the as-
surance, it tells us, of the active co-
operation of the Provinces and various Mun-
icipalities in carrying out such a policy.
Technical Schools, Agricultural Colleges
and other public institutions have agreed
to receive disabled men for training, and
many others have also been received
from private commercial establishments
to provide training and subsequent em-
ployment when the men have become
productive.

The period of training for a new voca-
tion will vary according to the previous
education and industrial history of each
individual. The cost of tuition will vary
in consequence, and also owing to the
fact that in many cases the tuition will
be free or the fees nominal. (The train-
ing will be free to the men in all cases.
If there is any charge, it will be paid by
the Dominion Government.)

The Commission has already under-
taken the provision of training in general
subjects and elementary vocational work
for all men under treatment in the vari-
ous hospitals and convalescent homes
operated by the Commission, irrespective
of whether or not such men will later be
subjects for vocational training leading
to new occupations. In a few cases, ar-
rangements have also been made for that
special training.

The Commission was not able, how-
ever, to put into operation a general
scheme of vocational training until a
scale of maintenance could be arranged
for the men undergoing the training and
for their dependants. The Commission
has therefore prepared a scale under
which a small sum for personal expenses
will be granted to the men undergoing
training, while provision on a sliding
scale is made for married men and their
dependants, and for those unmarried
men who have personally dependent
upon them.

Here is the scale which the Commission
has now been empowered to establish. It
will be understood throughout that
"maximum age" means 16 for a son and
17 for a daughter:—

1. A single man, with pension, living
in, receives free maintenance; that is,
board, lodging and washing.

2. Single man, with pension, living
out,—five a day.

3. A married man, with pension, living
in,—free maintenance and \$8 a
month, with the following additions:—
For wife having no children, \$35 a
month; less her husband's pension.

For wife with one child, if child is un-
der five, \$35; from five to ten years,
\$30.50; from ten to, maximum age, \$42.
20; less, in every case, the amount of the
husband's pension and the children's
allowances under the pension regula-
tions.

For wife and two children, from \$41 to
\$47 a month (less pension and allowance)
according to age of children.

For wife and three children,—\$44 to
\$50 (less pension and allowances) accord-
ing to ages.

For wife and four children,—\$47 to
\$53 (less pension and allowances), ac-
cording to ages.

A wife with five children,—\$50 to \$52
(less pension and allowances), according
to ages.

For wife and six children,—\$53 to \$55
(less pension and allowances), accord-
ing to ages.

A wife with seven or more children
under the maximum age may be given
the maximum allowance of \$55, less pen-
sion and allowances.

All these allowances for wife and chil-
dren will be paid direct to the wife, un-
less otherwise thought fit by the commis-
sion.

4. A married man living at home will
receive 60c a day. (This of course is in
addition to the allowances for wife and
children.)

5. A widowed mother, if dependent
upon the unmarried son who is receiving
training, and if the son made an assign-
ment of his pay to his mother and also
arranged for her to receive separation
allowance while he was on service, may
be paid at the same rate as the wife of a
married man with no children.

6. The parents of a man undergoing
training, if both are old and, past work,
entirely or partially dependent upon him,
may also be paid at the same rate.

7. The guardian of a widower's chil-
dren (under the maximum age) will be
paid monthly—for one child, \$10; for
two, \$17.50; for three, \$22; and \$3 for
each child in excess of three, with a
maximum of \$35.

Payments under these regulations will be
continued for one month after the com-
pletion of vocational training, whether
the man has secured employment or not.

It is clear that this system of allowance
will enable many men to take advantage
of the training offered, by providing for
their families while training is being
given.

The President of the Military Hospitals
Commission asks us to say that any fur-
ther information desired by our readers
will be gladly given on application to the
Secretary, at 22 Victoria Street, Ottawa.

Anglican Church

Service on Sunday next will be at 7.30
p.m., conducted by Rev. H. Clay. Sub-
ject: "Work." Sunday school at 2.30.
A hearty welcome to all.

The Rev. Bishop of Calgary will preach
at the morning service on Sunday, Sep-
tember 17th, afterwards proceeding to
Coleman, where he will hold a con-
firmation in the evening.

Vacation Days

are past and the little ones will soon skip to school, or
will they trudge? They will skip with light hearts if you
dress them well. They will trudge with heavy hearts if
they must wear their old clothes, when they see their
playmates clad in new attire. We can make the little
ones happy. Bring the children to our store, where they
are always welcome, and get some of the following things

Boys' Tweed Suits, Boys' Strong Tweed Pants
Girls' Dresses Children's Shoes
Ribbons, Etc., Etc.

Tiring, Ceaseless Back-Ache Cured Can Be Rubbed Away To-Night

Relief is Almost Unfailing
from Even the First
Application

RUB ON NERVILINE

Cold has a vicious way of finding out aching muscles or weak joints. How often pain settles in the back, causing inflammation and excruciating soreness. Stiffness and aching all over follows.

An application of Nerviline at the start gives immediate relief and prevents worse trouble.

When the pain is very acute, Nerviline has a chance to show its wonderful penetrating and pain-squelling power. It strikes in deeply, and its stick-indeed quality quickly proves its superiority to liniments rubbed on. Then this goodness is magnified by

its strength, easily five times greater than most liniments.

Surely so powerful and curative a liniment as Nerviline offers perfect security against pain.

Nerviline is the only guaranteed pain remedy sold in Canada. Forty years of success in many countries warrants its manufacturers' saying: "Use Nerviline, get your money back."

No curable pain, not even neuralgia, lumbago, sciatica or rheumatism can resist the magic power of Nerviline. Try it today. Rub it on your tired back, let it enter your sore muscles, let it take the swelling and stiffness out of your joints. It's a marvel—thousands say so that use Nerviline.

The large 50c family size bottle of Nerviline is the more economical than the 25c trial size. Buy the larger size today. Sold by dealers everywhere. Write to the Caltrop Co., Kingston, Canada.

The Control of Weeds

The Names and Habits of All Common Weeds Should Be Studied

Weeds are the robbers of the plant world. They creep into the fields and rob the plants of moisture, light, air, and plant-food. They often crowd out good clover and grasses in our meadows and pastures.

Every farm boy should learn the names and habits of all the common weeds. Whenever one is found, it looks as if it might prove mischievous it should be promptly identified. If nobody on the farm can do so it should be sent away to the Dominion Agricultural Department at Ottawa for identification and information concerning its control.

Among the commonest field weeds is the grassy pest known as foxtail. It is a kind of wild millet which grows from seed and lives only one year.

It is not a serious weed except when wet weather in June prevents land from being cultivated.

Most of the common weeds which infest cultivated crops live only one year. They produce lots of seed. These live long enough in the ground so that even after four or five years of meadow or pasture they are still liable to do damage to cultivated crops.

There is no easy way to get the best of weeds. The crops should be kept as clean as they conveniently can. The land hoe must be used so a cultivator cannot be depended upon to destroy all the weeds. The Dutch or push hoe is an invaluable article for this purpose.

In some sections the weeds which live from year to year spread by underground rootstocks as well as seeds are troublesome. Quack grass, Canada thistle, horse-nettle, and morning glory are the worst weeds of this type. These pests have about as much fight in them as the common annual weeds.

If they are cut off at the surface of the ground they come up again and again. But if you keep at it long enough you can kill them. Land infested with this kind of weed is oftentimes best put to alfalfa or pasture. Frequent mowing is hard on the weeds.

Pastures and meadows have weeds which generally do not bother corn. Sorrel, dock, ragwort, and buckhorn are the common weeds of this type. In alfalfa, blue grass is a bad weed. Most pasture and meadow weeds live over year after year.

Election Agent: That's a good long speech. Our people are not on the agricultural question wasn't it?

Farmer Flowsen: Oh, ay, it wasn't bad, but a couple of nights' good rain 'd a' done a sight more good—'til 'tis.

As the acorn grows to be the mighty oak, so children, when rightly nourished, grow to be sturdy men and women.

Good flavor and the essential nourishing elements for mental and physical development of children are found in the famous food—

Grape-Nuts

Made of whole wheat and malted barley, this pure food supplies all the nutriment of the grains in a most easily digested form.

It does the heart good to see little folks enjoy Grape-Nuts and cream.

"There's a Reason"

Sold by Grocers

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

"There's a reason why I'm celebrating my birthday with you," said the man.

"She's got to go to bed with it," replied Uncle Jacob, indignantly.

"She's the fourth."

Farm Grafters

Ravages of Parasites on Farm Animals Should Be Checked.

To graft is to live at the expense of someone else. If the one who does the grafting is done know of it and consents to it, then no crime has been committed. If it is done without his knowledge and consent, then it becomes a crime—graft in the full meaning of the word. But in either case the grafter is what is known by another name—a parasite.

The parasites found on farm animals and plants are criminal grafters and should be dealt with accordingly. When found, the extreme penalties of the laws of war should be visited upon them, for farming is a war as well as a business.

If there is any time of the year when the chickens should be watched carefully for lice and mites, the worst grafters in the poultry business, it is right now. The warm weather stimulates their growth and development. The chickens are rendered more or less indolent by the summer heat, they do not fight these pests as hard as on more comfortable days, nor do they rustle so hard for food. The mites are in it itself enough for them to have to fight against them, and they are not so quick to get rid of them as they are in the winter.

Among the livestock, chickens are most apt to be infested by the ravages of parasites or grafters than any other. And they should be watched carefully and given the most adequate aid possible. Especially the young stock, which is now building the foundation of their future, should be kept free of their quarters thoroughly with a strong insecticide. If you find them infested, you should give them a thorough treatment with some good and patient insecticide. The mites and lice are a poultry business, get rid of the grafters.

Prussians Tired of War

After Coming Into Contact With Britain's New Army, Are Glad To Be Made Prisoners.

Philip Gibbs, of the London Daily Chronicle, writing from the front after the smashing of the Prussian Guards, said: A large number of the officers were taken and sent to the straggling back over the battlefield in miserable little groups. Some of the officers were wounded and some were taken to the rear by stretchers or on their backs, and our men carried their wounded.

The Prussian Guards division, which had been so utterly broken that it no longer existed as a unit, was taken to the rear by stretchers or on their backs, and our men carried their wounded.

Those who did not fall into our hands have been withdrawn from the line. The fighting force, has been smashed. Even the officers admit that. They have no more stomach for the war and several men with whom I spoke today were frank in saying they were glad to be taken to the rear.

Some of them told me that if they were taken to the rear, they would go back to the front. They were brought to Cambrai, and while they were there they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

They were sent to the front, and they were sent to the front. They were sent to the front, and they were sent to the front.

Typhoid Toxins

Simple Precautions That Can Be Taken to Guard Against Infection.

The rules for guarding against typhoid, as laid down by the New York State Department of Health, are as follows:

1. Patronize only resorts that have a safe water supply and approved methods of disposing of the sewage.

2. Address a letter to "The Health Officer of the village or town to which you contemplate going, and ask him if the water and milk supply are safe and if the sewage is disposed of in a proper way."

3. Use only water that has been boiled or otherwise purified for drinking or culinary purposes.

4. Drink only pasteurized milk.

5. Protect all food from flies and other insects by screening doors and windows.

6. See that all outhouses are fully protected from flies by screens.

7. Thoroughly wash in pure water all fruits and vegetables eaten raw.

8. Wash the hands, using nail brush freely, before eating.

9. Before visiting a public place, submit to typhoid inoculation. It usually protects about four years.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. It cannot be got if the infant be troubled with worms. Mr. Worm Powders will destroy worms and drive them from the system, and afterwards the child's sleep will be sound and healthy. Worms cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Farming by Reflection

The Man Who Hustles Instead of Dreaming Is the One Who Usually Succeeds.

Every section has its easy-chair farmer, who thinks they are philosophers. They are great on the phrase "know thyself," and they waste their time in a vain search for moral lessons under the delusion that they are finding out about themselves and about the nature of human understanding.

That phrase "know thyself" goes back to the heathen gods; it was inscribed in gold letters over the portico of the temple at Delphi. But it is a waste of time to know yourself, for you are studying yourself as it is to lift yourself over a fair race by your own efforts.

There's Brown, a farmer of broad reading and high intelligence, a deep thinker, who studies it all out and cogitates, but somehow or other doesn't get results and doesn't get ahead. There's White, who has limited education and who never bothers about knowing himself, but who gets into action the minute he opens his eyes and keeps going until he finishes his day, and somehow he succeeds in a sense, and he is a self-reliant and successful man.

Farming by reflection is about as easy as trying to grow crops by last year's prices. It is a waste of time and money, and it is a waste of the hour, learning by doing is the way to knowledge as well as to dollars. The Country Gentleman.

Minard's Liniment Co., Limited. MINARD'S LINIMENT is on my vessel and in my family for years, and for every-day use. It has no equal in life. I would not start on a voyage without it. It costs a dollar a bottle.

CAPT. R. DESJARDIN, Schrs. Stork, St. Andre, Kamouraska.

Unhappy Germany. Germany is not without a concept of herself, but she is painfully cognizant of the fact that in wars of exhaustion the more numerous are likely to win if the contest is long enough. Germany and her allies number 160,000,000 and the United States has 90,000,000. Germany is fighting with their number of white men to say nothing of the assistance coming from the brown and yellow races. They hoped to gain a military decision. They do not see it on the horizon. They have spent the military capital they still want to believe that the result will be able to hold back the tide surging about them, but they are realistic enough to know that the result is at best uncertain. It is doubt arising spontaneously in German minds rather than those introduced from without that the German Government is seeking to allay. Germany wishes to hear of the negotiations, peace that will be made. The outside world wishes to hear that a revolution has occurred in Germany and that the Hohenzollern dynasty and Hohenzollern empire are no more.—New York Globe.

Teaching a Boy to Swim

What to Do and What Not to Do to Establish Confidence in the Beginner.

There is a prevailing notion, especially among a certain type of fathers, that the surest and quickest way to teach a boy to swim is to "throw him over his head and let him go to it." Probably a surer way to destroy a boy's confidence in the water has never been devised. Thousands of boys are thrown in the water without knowing how to swim, and have conceived a fear of the water by this foolhardy method that nothing has ever been able to remove. The father who resorts to it by a violent introduction, and the father who thinks along this line of teaching a boy to swim is making a fundamental mistake which he and his boy will regret for years to come.

The sure father-teacher of swimming is he who wins his boy's confidence by first getting him accustomed to the water in shallow places, and then gradually have the boy come in deeper and deeper water until the boy swimmer hardly knows that he has ventured beyond his usual method of teaching. It is not the "easy" method of teaching a boy to swim that is the father like to think; it is the only normal and sane way. It is the father without a knowledge of human nature who decides otherwise.

From the Ladies' Home Journal.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald more rapidly than any other preparation. It can be had in every kitchen so that it may be available at any time when a burn or scald occurs. Just apply the oil to the burn or scald and the pain will abate and in a short time cease.

Big Prizes of War

Officers and Crew of H.M.S. Highflyer Get Large Sum for Sinking German Boat.

The officers and crew of H.M.S. Highflyer have been awarded \$12,000 in prize money for sinking the German auxiliary cruiser Kaiser Velt in the North Atlantic. The command of the Highflyer is stated that he caught up to the enemy while she was on her way to a cruise of 500 miles, and he opened fire upon him, and so he sank her with a crew of 500 men, all of whom were saved.

In the case of a neutral vessel, the Highflyer, in the Swedish cargo ship, 3,238 barrels of herrings was consigned to a German port, the Scandinavian steamer, sent to a vessel which was used to ship was put to. Half the cargo was subject to confiscation and he held that was a lawful prize of war. The same judge, Sir Samuel Evans, condemned the prize of the Highflyer, a cargo of enormous quantity of 6,000 tons of rice, worth \$500,000, seized on four days ago in the Adriatic, near Trieste, and sent to the German port of Trieste.

After Napoleon's departure Kleber concluded a convention at El Arish, by which the French were to be allowed to capitulate and were to be sent to the coast of France. This agreement was however, never carried out.

Oil Of Orilene Will Reduce Weight A Pound A Day

In many instances, if you suffer from, excessive
fat, stomach or liver disorders perhaps you do
not know your trouble may be due to lack of
oxygen in the blood. How to tell

If you will make an actual test of all people
who are fat, who suffer from stomach, liver, or
kidney trouble, you would be surprised at the
exceedingly large number who lack oxygen in
the blood and who are fat and ailing from no
other cause. Without oxygen the blood loses
its power to properly assimilate your food and
consequently your flesh instead of being firm,
black and healthy, becomes flabby, soft and
blubbery. As a result of this blood starvation
you become fat and slow, generally weakened,
all has down and soon get to a point where the
least exertion leaves you breathless and sufficed
like a porcupine. In all such cases it is worth
while to use Orilene, a powerful blood purifier
and blood builder, to do your own health, for
it has done so for thousands of people, and
marks the apex of your life later on. And
you must not hesitate to put on Orilene. Ex-

cessive fat, stomach or liver disorders perhaps you do
not know your trouble may be due to lack of
oxygen in the blood. How to tell

anyone knows fatty degeneration of the heart
liver or kidneys is exceedingly dangerous.
No matter what anyone tells you, if you are
fat you owe it to yourself to make the following
test: take a long deep breath and then see how
much you can take without being compelled
to let it out. Next take an oil of Orilene
capsule, one after each meal and one at bed
time for two weeks then make the same test
again. You will be surprised to see how much
farther you can walk and how much lighter and
easier you will feel on your feet. People who
are fat and ailing all the time may double their
strength and endurance and reduce weight a
pound a day by simply taking oil of Orilene.
Oil of Orilene capsules are designed to cleanse
the little red corpuscles in the blood making it
possible for the blood to carry more oxygen
supplying the body with more life, vigor and
more vigor. Absolutely harmless, will not
injure the most delicate, wonderfully effective.
It is dispensed in this city by all druggists,
can be had direct from Dr. W. Little, 170
Box 120, Montreal, P.Q., on receipt of a
postal note or money order. There is nothing
better.

A Censored Social Report in Paper

(Rehebe's Sunday Herald)

The troubles of a society editor in a
small city are reflected in the following
society item which appeared in a British
newspaper.

"Miss Cleopatra Grubb entertained at
bridge and whist and dancing yesterday
afternoon. The first prize in cards was
won by — (censored because she
sings in the choir). Second prize was
captured by Miss — (kept out be-
cause she teaches in the public schools).
Consolation prize was taken by Miss
— (kept out by special re-
quest. Her mother objects to cards)."

Among those present were as follows:
Miss — (kept out because of
death in family recently), Miss —
(censored because her employee
objects to dancing), Miss —
(teaches in public school and Mrs.
— (husband is out of work
and she doesn't want to appear extrava-
gant). The guests departed under cover
of darkness and in closed cars.
(The above is taken from one of our
foreign exchanges. It sounds like some-
thing might be made to apply locally.)

The Political Shepherd

The following political points have been
before the public for many years, and is
applicable to any modern campaign:

"The politician is my shepherd; I shall
not want any good thing during the cam-
paign. He leads me into the pasture for
my sins; he feeds me with words of
good cheer; he fills my pocket with
good cigars; he gives me a glass of beer
rushed over. He prepares my ticket for
me in the presence of my better judgment.
Yes, though I walk through the
thicket and mine in vote for him, and
myself honest, when he is elected straight-
way he forgets me; he, when I meet him
in his own office he knows me not.
Surely the wool has been pulled over
mine eyes all the days of my life and I
will kick myself forever. Greenwood
Lodge."

Encouraging Idleness

The Calgary Albertan makes some very
pertinent remarks about the cutting off
of the patriotic fund from soldiers' wives
who are able to work and earn money.
This, the Albertan argues, encourages
idleness on the part of many a soldier's
wife who might be doing something to
release another man for the front, and to
aid in furthering the war's victorious
conclusion. The Albertan says:

"If the wife of a soldier works and
earns some money, she is not permitted
to share in the patriotic fund. This regu-
lation may have been a wise precaution
when war broke out, but it is an unfor-
tunate one in many respects now. It
places a premium upon idleness at a time
when the services of every Canadian are
in demand."

"The basic idea of the fund is that the
Canadian public protect from need the
house of the soldier. The added fund for
the family is available only when it is
needed, and it is assumed that it is not
needed if the wife is earning for herself."
"But it works out in another way.
Wives of soldiers who in many cases
would prefer to earn money for their
rainy day, which always threatens, can-
not do so without losing the patriotic
fund, and as there is nothing to gain by
working, they naturally prefer to remain
idle. As the regulation is now, they
would be working for nothing."

"When the patriotic fund was organized
there was a surplus of labor both
male and female, and the restriction if
not unreasonable, at least was not un-
expected. But conditions are different
now. There is a demand for labor, particularly
female labor. The restriction in the
patriotic fund is causing much inconvenience
to the public, as well as limiting
the income of the soldier's family."

"Why not remove that limitation, and
if the faithful wife does turn her hand to
work and lays by something for an
emergency, every person will be the bet-
ter for it."

"Let the woman work if she wants to.
The wife will be better for it.
The soldier will be better for it. The
public will be better for it, both now and
after the war."

"The restriction is a foolish one, which
not only encourages, but practically de-
mands idleness at a time when there
should be no idleness."

Two new separators were un-
loaded by the Doukhobors at Lund-
breck on Thursday morning.

British Battle Pictures

Picture postal cards from official pho-
tographs of battle scenes in the great
British offensive will be in a few weeks be
within reach of all throughout the Em-
pire.

The British Official Bureau announces
that for "The exclusive right of making
and selling, in the United Kingdom,
postcards from photographs taken by
official photographers on the Western
Front and issued by the Press Bureau,
the tender of the Associated Newspaper
Limited (the London 'Daily Mail') has
been accepted. The terms offered by the
successful tenderer are half the cost of
the undertaking with the minimum
payment of £5,000."

"The money will be devoted to military
charities."

The "Daily Mail" and the "Overseas
Daily Mail" are taking steps to place the
postcards on sale throughout the whole
Empire.

The War Office has given unlimited
facilities to the photographers in the
fighting since the first of July, and their
pictures, taken under the smoke and roar
of battle, are a unique record of the great
Advance.

The pictures will be reproduced in sil-
ver-print style (imitation photograph) in
photography and in colors. They are
to be made up in packets of eight post-
cards, for sale at 6d. a packet.

Announcements may be looked for as
to the arrangements for sale in the Do-
minions, but inquiries may be addressed
to the War Picture Department, "Daily
Mail" Office, Carmelite House, London,
England.

Where The English Channel Flows

(Tune of "Where the River Shannon Flows).

There's a little fleet awaiting
When the English channel flows,
And why Germany wants to pick on
them.

The good Lord only knows,
But we'll be there to meet them
With shot and shell we'll greet them
And to cannon balls we'll treat them
Where the English Channel flows.

There's a little fleet that's gone to battle
There are letters written for
Can-a-da, and we're glad that they are
there;

Now mothers, wives and sweethearts,
Just dry the tears that flow
And let our boys have gone to
fight
Where the English Channel flows.

England may call on Ireland, Scotland,
Australia too,
But she won't forget her Canadian boys,
For she knows what they can do.

At South Africa they were on the day
Against old England's foe
And we'll show the world what they
can do
Where the English Channel flows.

Cr.
Now the war has started
Where the English Channel flows,
And the call for men we've answered
As every body knows,
In bravery we'll never lack
And when our boys come back,
They'll bring victory for the Union Jack
Where the English Channel flows.

Cr.
Now the war has started

Where the English Channel flows,
And the call for men we've answered
As every body knows,
In bravery we'll never lack
And when our boys come back,
They'll bring victory for the Union Jack
Where the English Channel flows.

Death of C. M. Eddington

The death occurred at Rochester,
Maine, on Monday morning last, of
C. M. Eddington, of Blairmore.
Mr. Eddington had been suffering
from an internal complaint for
some time and was advised by the
local doctors to proceed to Roches-
ter for special treatment, and left
Blairmore for that point on the
20th. He died, however, before
the operation could be performed.
Mr. Eddington was forty-three
years of age and leaves a wife and
child. He came to Blairmore
about four or five months ago and
occupied the position of chemist at
the local pharmacy. Mrs. Ed-
dington and her brother left last
night for Chatham, Ontario, where
the remains have been removed
and where interment takes place
immediately after their arrival.

Central Union Church

Dr. E. H. GRAY, Pastor.

Sunday, September 3rd—

11 a.m., Public Service and Bible Class.

Subject: "Paul's Sorrows and Comforts." Scripture Lesson: 2nd Cor.

11:21-12:10.

7:30 p.m., Public Service and Sermon.

Subject: "The Value of the Soul."

Stangers and other visitors are cordially invited to these services.

Cowley Happenings

Andrew Drewry has purchased a
new Franklin car.

Corporal C Crawford, of the
192nd Battalion, is visiting in town
now.

Wheat cutting will be general in
these parts soon, weather permit-
ting.

A few more good hot days with
out frost and the crops will be
secure.

J Littleton went to Macleod on
Thursday to take up his work in
the bank there.

Mrs. W. T. Eddy and daughter
Hilda intend going to Calgary to
spend the winter.

Twenty men are working on the
construction of the Doukhobors'
new elevator here.

Peter Vercign, of Brilliant, B.C.,
came here this week to spend some
time with the Doukhobors.

N Cyr and family, of Lund-
breck, were the guests of Mr. and
Mrs. P Fortier on Sunday.

Wilbert Fortier left on Monday
night's train for Foremost, where
he will work with a threshing crew.

The Women's Institute met on
Saturday last. They are still on
the job raising money for the Red
Cross.

Miss Agnes McMillan, who has
been visiting in the northern part
of the province for some time, has
returned home.

A government road gang is busy
on the road south of town. Wm
Lighthart and his son Sinai are
helping with their teams.

On Saturday night the heavens
seemed to be aflame with the aurora
borealis, which covered the entire
sky. Wonder if anybody noticed
it?

Mrs. Joe Morgan has returned
from the coast. As her health is
not much improved, she brought
along a trained nurse with her.
Mrs. Morgan expects to return to
the coast soon again.

The U.F.A. met on Saturday
with a good turnout. The meeting
was especially interesting. One
feature was the securing of a new
manager for the U.F.A. store, Mr.
Howie having sent in his resignation
some time ago.

SYNOPSIS OF CANADIAN NORTH WEST

LAND REGULATIONS

The sole heir of a family, or any male over

18 years old, may homestead a quarter

section of a valuable Dominion land in Manitoba,

Saskatchewan or Alberta. The applicant must

appear in person at the Dominion Lands Agency

or Sub-Agency for the District. Entry by proxy

may be made at any Dominion Lands Agency

(not Sub-Agency), on certain conditions.

Duties—Six months residence upon and culti-

vated the land in each of three years. A

homesteader may live within nine miles of his

homestead on a farm of at least 80 acres.

The area of cultivation is subject to reduction

in case of illness, scrubby soil, or other

natural causes. A habitable house is re-

quired except where residence is performed

by the venditor.

In certain districts a homesteader is good

standing may pre-empt a quarter-section along

the homestead. Price \$20 per acre.

Duties—Six months residence in each of three

years in the certain homestead section; also 80

acres extra cultivation. Pre-emption patent

costs \$100.

A settler who has exhausted his homestead

may also homestead in certain districts. Price \$20 per acre. Duties—Six

months residence in each of three years; culti-

vated the land in each of three years. A

homesteader may live within nine miles of his

homestead on a farm of at least 80 acres.

The area of cultivation is subject to reduction

in case of illness, scrubby soil, or other

natural causes. A habitable house is re-

quired except where residence is performed

by the venditor.

In certain districts a homesteader is good

Bellevue Happenings

R. Eccleston was visiting at Coleman on Saturday.

Mr. and Mrs. James Lindsay paid a visit to Fernie this week.

Ed. Coupland received slight injuries in No. 2 mine last week.

Miss Sarah Large has accepted a position at the homebakery.

Mrs. William Ashwick returned to her home in Fernie this week.

R. Eccleston paid a business visit to Calgary during the week.

Mrs. James Burrows returned to Columbia Gardens, B.C. on Tuesday.

Capt. T. M. Burnett was down from Calgary this week on business.

Mr. and Mrs. Vandorp spent a couple of days fishing at North Fork.

Bill Cole has quit the C.P.R. and taken charge of the pool room again.

Mrs. W. H. Chappell was down from Blairmore on Monday, visiting friends.

Mr. and Mrs. Fred Henson were visiting in Blairmore on Wednesday afternoon.

Mr. and Mrs. F. Woodhouse, of Fernie, have arrived to make their home in Bellevue.

An enjoyable social was held at the Methodist church on Wednesday evening last.

THREE HOUSES FOR RENT, near the Rosedale Dairy, Bellevue. Apply to Fred Chappell, Burnett's store.

The son of Mr. and Mrs. Abel Brux was taken to the hospital this week to have a fish-hook removed from his foot.

Mrs. E. Collier, who has been

visiting in Bellevue, the guest of Mrs. W. Fisher, has returned to her home at Oklahoma.

W. Duncan, who has been "barbering" at Cole's poolroom, pulled out this week for Washington, where he will reside in future.

A couple of Bellevue's soldier boys appeared before the court at Hillcrest to answer to the charge of having fished without a license.

A Kelly, who has been visiting his home in New Brunswick, returned this week to take up his duties as principal of the school for another term.

Miss Lee, who at one time taught at Pissburg, has accepted a position on the staff of the Bellevue school, and started in on Monday. Misses Hoar and Williams are still on the teaching staff.

A Goodwin met with an accident during the week, being thrown from a horse, receiving several nasty cuts about the face. We are pleased to report that he is doing well and hopes to be around in a day or so.

Frank Happenings

George Boyes has purchased a Ford car.

Al. Trietram spent the greater part of the week in Calgary.

Mrs. Fairhurst and Mrs. Allison were visiting at Hillcrest on Thursday.

Mrs. J. J. Thomas left for her new home at Alliance on Monday night.

Mrs. Walter Miller was up from Bellevue Wednesday, visiting friends.

Rev. Arthur. Barner, superintendent of Methodist missions, will conduct the Methodist church service at the Sanatorium on Sunday.

A letter has been received from Private Fred Parker this week. Private Parker has been a prisoner of war in Germany for some months, and states that he is getting

along alright and very lucky to be living. He had not seen anything of Tom Marsh since he left him. Marsh was alright then. He said they were not treated the best, but hoped to pull through alright. He gives his address as Pte. Fred Parker, No. 503287

2nd Tunnelling Co. Engineers
Komp II, Gruppe III,
Barracks 27 A.
Dulmen, Gesangeneclader,
Germany.

Italy has declared war on Germany and there may now become

thing going.

A local young lady of fifty-three announces that she has received a proposal from a veteran of Western Canada's forty years ago, and that if Dame Fortune is not interfered with another proof that "unity is strength" will be established.

A Lesson From The Aeroplane

The force that makes the aeroplane - a heavier than air machine - overcome the law of gravity is the propulsive power of the motor. Stop the engine and gravity exhibits its law.

In much the same way the propulsive power of advertising makes a business triumph over dragging-down tendencies, personal inertia, quiet times and general business depression.

Advertising is the propellor. The merchant is the pilot. His business is the machine. His community is his sustaining medium. If you want business to soar, start the motor of advertising.

To The People of This District

The pilots of every dominant and progressive local business are using the propelling force of advertising in some form or other.

The most powerful form of Advertising is
Newspaper Publicity.

Threshermen and Weeds Act

Manitoba Weeds Commission Takes Action to Safeguard Farmers

The Manitoba Weeds Commission has today sent out from its office placards to be posted on threshing machines setting forth Sec. 7 of the revised Provincial Weeds Act. This section is of great interest not only to threshermen, but also to farmers, its four sub-sections provide as follows:

(1) It shall be the duty of every person owning or operating a threshing machine immediately after completing the threshing of grain at each and every point of working, to clean or cause to be cleaned, the said machine, together with all wagons and other outfits used in connection with such threshing, so that seeds of noxious weeds shall not be carried to or on the way to any place of deposit.

(2) Any person not complying with the provisions of this section shall be liable to a penalty of not less than twenty-five dollars nor more than one hundred dollars, or to imprisonment for one month, or to both, at the discretion of the court.

Minard's Liniment Cures Garget in Cows.

Forestry in Europe.

In England and Wales, according to a recent report of the Forestry Commission, there are nearly 2,000,000 acres of forest, and large areas of uncultivated land on which it is the intention to cultivate a growth of timber. In Denmark the purpose of any forest area, however small, is to mean carries the right to administer it in accordance with the plan and desires of the new owner. Until he has been the registered owner of such an area for five consecutive years, he is not permitted to cut down a tree without authority of the Minister of the Interior.

Empire Builders in a Hurry.

Over-anxious politicians by attempting to "rush" the question of Empire reconstruction can undo the work of all the heroic Empire-builders in British history. The refusal of the Canadian press, generally speaking, to jump hastily to conclusions is very satisfactory. Regarding the rights of others under the flag as well as pride in the Empire itself make it desirable to exercise important and difficult Imperial problem shall be paid the respect of close and exacting study.—Montreal Mail.

Unwittingly Kind.

Cholly Ayres, since the Parkers lost their money, has stopped calling them.

That's Kert! That is very kind of you. It ought to cheer them up a whole lot.

DOG DISEASES

And How to Feed

By H. C. CLOVER, D.V.M.

111 West 31st Street, New York

THE NEW FRENCH REMEDY, DR. H. C. CLOVER'S THERAPION

Used for all kinds of

DOGS, CATS, HORSES, CATTLE, PIGS, BIRDS, AND ALL OTHER ANIMALS.

It is the only remedy that will cure all the diseases of the above animals.

It is the only remedy that will cure all the diseases of the above animals.

World's Potato Crop

Germany Leads in Total Yield for Year of 1914.

The world's potato crop in 1914 covered 30,000,000 acres, giving a yield of 4,375,000,000 bushels. Of the total acreage Russia had 9,000,000 and Germany 8,367,000. Germany led in total yield, however, with 1,674,000 bushels, against less than one billion for Russia. France had half a billion bushels, and the United States 405,000,000.

In yield per acre, Norway came first with an average of 100 bushels; Great Britain and Ireland second with 241, France third with 230, Holland fourth with 223, and Germany fifth with 200. The average for Canada was 180, and for the United States 129.

In Germany, which produces well over one-third of the world's potato crop, only 28 per cent. of the yield is used for human food in normal years. Forty per cent. of the total is fed direct to animals, 10,000,000 bushels are used in the making of alcohol, and 10,000,000 bushels are utilized in the manufacture of starch and allied products.

In Japan a start has also been made on the manufacture of starch from potatoes in a large way. The output for 1914-15 being 35,500,000 pounds.

Good-bye to Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

Honor to Uruguay

Only Country That Would Send a Ship to Rescue Shackleton Party.

Uruguay is a little country, especially as South American countries go, and few people in this part of the world know much about it except as a place from which to cut across the Atlantic. It is a country of great stretches of a big river, and that its chief products, as the geographers say, are cattle and sheep. It is a country of great stretches of a big river, and that its chief products, as the geographers say, are cattle and sheep.

Of all the nations not engaged in a great war and therefore desperately busy, only Uruguay has had the impulse to send a ship to bring back the men back from their desperate struggle in the Antarctic.

Uruguay's obligation to rescue these freezing and starving sailors and to the knowledge of the world, more than the one resting on the other larger and richer non-belligerent countries, is a knowledge as that of Great Britain those brave explorers risked their lives.

But it was Uruguay that had the happy thought and is carrying it out at its own expense.—New York Times.

A Standard Medicine.—Parmed's Vegetable Pills, compounded of entirely vegetable substances known to cure constipation and salutory effect upon the digestive organs, have through years of use attained so eminent a position that they rank as a standard medicine.

The simple remember this. Simple in action, but not in effect. It is simulated by the weakest stomach and are certain to have a salutary effect upon the digestive organs.

English Stock Breeding and the War. Notwithstanding the war, British pure-bred stock is being sold in all parts of the world. A shipment of Yorkshire was recently made to South Africa a short time ago has attracted the notice of the public, and a lot of his breed in the new commonwealth. A shipment of Oxford rams was recently bought on Chilian account.

Farmer and Stock Breeder from those that have been in the war. English breeders are already preparing for the larger trade with France that is expected to follow after the war. The French demand for breeding sheep is expected to be especially large. French authorities have said at the conclusion of hostilities there will be a large extension of the area of pasture land in France, and that the breeding of sheep will be greatly increased. There is little doubt, says Farmer and Stock Breeder that there are several English breeds which would produce a distinct improvement among the local breeds of France and Russia.

Schoolboys' War Geometry. The Lyonian, the organ of the Lower School at Harrow, writes the following: A subaltern is one who has a position, but no magnitude. A Turkish communicative officer has no point. A soldier equal to a Tommy is equal to anything. If things are double the price of the same thing obtainable elsewhere, it is a War Office contract.

A Londoner who was staying in Scotland for a little while recently had need of legal assistance. So he went up to a sensible-looking man in the street and began:

"Well," was the cautious reply, "I've leaved here a matter of fifty years."

"Ah! then, perhaps you can help me," went on the visitor. "I'm looking for a criminal lawyer. Have you one in this town?"

The Scotsman dropped his voice to a confidential whisper as he answered: "We live, but we have been able to prove it against him yet. He's that shrewd."

When Buying Matches Specify "Eddy's"

Sixty-five years ago the first Canadian-made matches were made at Hull by Eddy and since that time, for materials and striking quality, Eddy's have been the acknowledged best.

Grain Smut

Treating Seed Grain for Smut Is a Good Practice.

When grain first heads out is the best time to observe the amount of smut. The smuts of grain are carried from year to year in the spores which settle on the surface of the kernels of grain. If a head of smutted grain is observed in the field and one takes pains to track head down to the plant from which it comes and pulls up the whole plant, he will find that all of the heads coming from that plant are smutty, and consequently will not produce grain.

Throughout the West, there is a loss usually of from one dollar and upward per acre of grain due to the effects of smut.

Practically every particle of this smut can be controlled by treating the seed grain. Every farmer knows how to treat seed grain, and he can find out very easily. The cost of treatment, labor and material included, will normally be less than five cents per acre.

We know of no other investment that will return as large a profit. We are sure that if farmers would treat for smut if they would take the trouble to examine their grain fields, they would find out that actually make a count of the smutted heads in a given acre.

It is a waste of time to drop a barrel hoop down in a grain field and count all the stalks of grain within the hoop, and then count the number of smutted heads. It is one does not actually look for smut, he may pass it by. The farmer who does this is as much as ten to fifteen per cent. of smutted heads and never notice them.

The Life of the Guns

Erosion Soon or Later Impairs the Accuracy of Fire.

The life of a gun depends upon the progress of erosion, which sooner or later impairs the accuracy of fire. Erosion is caused by the action of the explosive gases at high temperature and pressure, according to the Iron Age, the hot gases cause a thin film of steel to about the barrel. The film expands and becomes set. Upon the release of the pressure, it contracts, which causes a slight change in the barrel.

As they increase in size they form passageways for the gas, and that tends to enlarge them still further. The inner surface of the barrel becomes rougher, and the bands begin to corrode. Finally, the bore becomes so enlarged that the bullet cannot acquire its proper rotation, and its flight becomes erratic.

The film expands and becomes set. Upon the release of the pressure, it contracts, which causes a slight change in the barrel. As they increase in size they form passageways for the gas, and that tends to enlarge them still further.

GOOD DIGESTION

A SOURCE OF HEALTH

When the Stomach Is Out of Order the Whole System Suffers.

Indigestion is one of the most distressing malaises which mankind knows. When the stomach is unable to perform the work nature calls for, the sufferer is in severe pain after eating, nausea, heartburn, suffering of the heart, sick headache, and often a shaking for food, though the sufferer is really half starved. People with poor digestion, too, frequently try all sorts of experiments to find the process of digestion, but there is only one way in which the trouble can actually be cured, that through the blood.

That is why the tonic treatment with Dr. Williams' Pink Pills is so successful. They make rich, red blood that strengthens the stomach and the nerves, thus enabling it to do its work. The process is simple, but the result means good appetite and increased vigor and pleasure in life.

In proof of these statements, Mr. Albert Hall, Sonya, Ont., says: "I have a wonderful result. For two years I was a great sufferer from indigestion, and I was unable to do any physical work. At times my suffering was so great that I was unable to attend to my household duties. I was afraid to go to work, and I was afraid to go to bed. I was afraid to go to work, and I was afraid to go to bed."

When I was turned out of my other British machine and Fokker was satisfactory. Get Dr. Hamilton's Pills today. Six per box at all dealers.

Air Fighting

Aerial Warfare as it Occurs at the Front Day by Day.

We obtain a glimpse into the actualities of aerial warfare as it occurs day by day over the lines of the Allies and those of their enemy, in the following account of a correspondent's experiences.

Lieut. D., with Lieut. E., while on an artillery duty, attacked a hostile machine near Laventie. The Fokker was opened at about 300 yards, but at this moment Lieut. D. was attacked by a Fokker from above and behind. The Fokker tried to win forty yards, when Lieut. D. swerved slightly to avoid the enemy's fire. Lieut. E. then attacked the Fokker at point-blank range. The Fokker banked over to the left, and something which looked like a box fell out. The machine then rose, and was last seen spiralling down close to earth. From other sources it is reported that the Fokker was seen to land at the northeast corner of Bois de Biez.

A machine, Pilot Lieut. U. and observer Corp. V., when patrolling over Amay at about 9 p.m., attacked three Fokkers, seen behind the enemy's lines, and the latter were off. The remaining two made for Lens, to which they were directed. The Fokker attacked Lieut. U. and joined in the fighting, diving on to the attacking Fokker, which turned away and disappeared. The other British machine and Fokker were also seen to disappear. The British machine and Fokker were also seen to disappear.

When Lieut. U. turned off, the other British machine and Fokker were also seen to disappear. The British machine and Fokker were also seen to disappear.

Holland's Help To Belgians

Excellent Work Being Done in Looking After Refugees.

Holland is certainly casting bread upon the waters. In addition to the sum of \$5,000,000 supplied Belgium through donations, \$5,000,000 has been contributed by the Dutch government. Two million dollars have been voted for the coming year and unless peace comes soon one million more will probably be granted. The Belgian government has made an offer of reimbursement which Holland declines. The refugees camps, under control of the government, are well organized and have churches, schools, shops and post-offices.

The refugees are not compelled to work, but a small wage is offered as an inducement to do so, and they are employed in constructing small wooden houses which can be used for shelter. The American factor in the war is the Dutch government.

Excellent educational facilities are offered under the direction of the Dutch-Belgian commission. 50 primary schools have been established, with 4,500 scholars, certified Belgian teachers being employed.

WANTED NOW

An energetic reliable local agent for Blairmore and surrounding country to sell Hardy fruit trees.

Flowering Shrubs, Forest Seedlings, for shelter belts, Small Fruit Bushes, Etc.

A collection of varieties includes many hardy RUSSIAN VARIETIES for severe districts. Good pay weekly, outfit, exclusive territory. Our agency is valuable.

Write for particulars. Department B, PELHAM NURSERY CO., TORONTO, ONT.

BLAIRMORE, ALBERTA

Turkey has declared war on Roumania.

Wednesday's casualty list contains the name of Daniel Lewis, No. 412716 amongst the wounded. Daniel Lewis is a Blairmore boy and could not have been long in the trenches. He left the Pass with the 54th Kootenay battalion.

As a result of drinking wood alcohol, it is believed by mistake, E. Neilson, a rancher living near Macleod, died yesterday, and Jean Johnson, a neighbor, at whose ranch the poison was taken, is seriously ill and may not recover. Mr. Neilson leaves a large family, who are visiting in the east.

The Stifts Tidende of Ribe, Denmark, is quoted in a Reuter dispatch from Copenhagen as saying that the commander of the submarine which sank the Lusitania was Captain Max Valentiner, son of the Dean of Sondersborg Cathedral. Valentiner, the newspaper says, has been decorated with a number of orders since the sinking of the liner including the Iron Cross of the first-class, and the Hohenzollern House order and with a sword the special distinction and personal gift of the German Emperor.

Strapped to a heavy arm-chair and hysterically calling to be taken back to court, Rico Ferrante, who last year decapitated his partner, Dick Porac, and dropped his head down a well, paid the extreme penalty of the law at Vancouver, B.C., recently. He put up a terrible fight against his executioners and before he left the death cell had to be pinioned and strapped to a chair on the trap. The priest who accompanied Ferrante to the scaffold attempted to offer him spiritual consolation, but he paid no attention. Executioner Ellis yelled fiercely in Italian at the condemned murderer, bidding him be still, and at the same time tightening the noose until it choked off the utterances of the repeated cry to be taken back to court.

D. J. Campbell and son were up from Macleod yesterday.

Greece is expected to join the Allies within the next twenty-four hours.

Thanksgiving Day has been fixed this year for the second Monday in October.

Misses Mary and Margueretta Williams, of Bellevue, are visiting friends in Calgary.

The owners of the Blairmore hotel are having the damage which was caused by the recent fire repaired.

Mrs. H. Merrifield and her son Harry, left town for Calgary on Tuesday night, where they will reside for the present.

The death occurred near Nakusp, B.C., on Saturday night last, of Mrs. Graham, wife of William Graham, manager of District 18 of U.M.W. of A.

The Lethbridge Herald announces that Miss E. M. Fulton, of the Blairmore teaching staff, has accepted a position as teacher with one of the Edmonton public schools.

The Montreal Ammunition Co., capitalized at \$800,000, has paid out in dividends during the past eleven months the modest sum of \$2,250,000. It expects soon to reach the \$2,750,000 mark.

Rev. A. S. Tuttle, M.A., of Medicine Hat, has received a call to McDougall Methodist church, Edmonton, which he has accepted. He will succeed Dr. Armstrong, who goes to Fort Rouge, Winnipeg.

Capt. A. E. Porter, the newly appointed physician in charge of the Government's soldiers' tubercular sanatorium at Frank, was in town on Thursday. Capt. Porter is well known in these parts, having for years practiced medicine at Coleman.

L. P. Robert has invested in a Ford car.

Electrical railways of the United States represent a valuation of \$730,000,000.

English colonies total 13,002,321 square miles in area with a population of 389,065,085.

It is said that the streets of London, if laid end to end, would stretch from New York to San Francisco.

The world's turpentine output exceeds 24,000,000 gallons annually, the United States being the greatest producing nation.

Rumor has it that the Blairmore Brewery building is to be converted into a convalescent home for booze artists—in other words an art gallery.

Beef is said to have gone up because of the scarcity of water, and water seems to be going down in Alberta because of the scarcity of booze.

A process has been invented in England for coloring wool various khaki and orange shades with dilute nitric acid, without the use of natural or artificial dyes.

The editor of the Free Lance, published at New Glasgow, Nova Scotia, has the following to say of Alberta in a lengthy wireless of his recent trip to Western Canada.

"Sunny Alberta was not as sunny as it might have been when the boundary was crossed. Alberta, however, is a great province, and the more we saw of it the more we liked it. The enormous development which has taken place in Saskatchewan and Alberta during the past twenty years is only an earnest of what the next twenty years have in store for those large and important provinces. Nature has done much for them, and they will enter into their own from now on."

Mrs. J. H. Farmer and children are spending the week in Calgary.

Mrs. F. M. Pinkney is spending a few weeks with friends in Calgary.

Three Ford cars of the 1917 model were unloaded here by D. A. Sinclair on Tuesday.

Roumania declared war on Austria on Sunday last, and it is reported that Germany has declared war on Roumania.

Roy McKachern left for Lethbridge last night, where he will spend a week at his home before taking up his new duties in the Royal Bank at Regina.

The Labor Day celebration in Blairmore on Monday next promises to be a big attraction and Blairmore will likely have a few thousand people to look after.

About 4,000,000 tons of herrings are caught in Japan every year. This enormous quantity is used not only for human consumption, about four-fifths of it is used as a fertilizer for the rice fields.

A typewriter which will print 4,000 Chinese characters has been invented by Mr. Hui Kon Chow, of Shanghai. As yet no fast work can be done on the machine, but Mr. Chow is confident that improvements will be made.

It is estimated that the grain crop in Saskatchewan this year in round figures will consist of 125,000,000 bushels of wheat and 100,000,000 bushels of oats, with barley and flax thrown in for good measure.

An application has been received for a position on the teaching staff of the Blairmore school from a young lady of twenty-five years who has had eighteen years' teaching experience. She's a westerner, and they start in early out west!

Mrs. J. W. Waddell and Mrs. W. L. McKenzie and children, who had been spending a few weeks in Blairmore, returned to Lethbridge this week.

D. A. Sinclair has secured the contract to single the roof of the Sanatorium hotel and make other renovations necessary in order to fit the institution as a hospital.

Misses Darrach and Fulton will return to Blairmore about Monday morning from a two months' holiday spent at their homes in Prince Edward Island and Nova Scotia respectively.

Rev. Dr. Gray, of Blairmore, and Rev. D. K. Allan, of Coleman, attended the district meeting of the Presbyterian church held at Pincher Creek this week, and returned home Thursday morning.

The Canadian National Exhibition, opened at Toronto on Monday, has been designed to symbolize the unity of the allies against the military menace of Prussia. The exhibition was opened by Sir George Perley and the attendance already assures its success. A feature of special interest to Westerners is the excellent exhibit made by the Canadian Pacific Railway, showing the agricultural, mineral, timber, fisheries and fur-bearing resources of Canada, particularly of the Western Provinces.

The story that the German submarine Bremen has been captured by the British, brought in by passengers arriving Friday last on the Baltic and a week or so ago on the Andania, is generally accepted in New York as true in German official circles. While men close to the German embassy deny any official news of the capture has been received, they say the Bremen is many weeks overdue, and they believe she has been either captured or sunk.

R. DAWSON,
District Passenger Agent, Calgary, Alta.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

"THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for his District. Entry by proxy may be made at any Dominion Lands Agency (not Sub-Agency), on certain conditions.

During his month's residence upon and cultivation of the land in north of three years. A homesteader may live within one mile of the homesteaded land, or at least 50 acres, or 100 acres in case of rough, scrubby or stony land. Live stock may be submitted for appraisal under certain conditions.

A settler who has exhausted his homestead right may take a pre-emptive homestead in any District. Price, \$2 per acre. Duties—Must reside six months in each of three years, cultivate 20 acres and erect a house worth \$200. The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be submitted for appraisal under certain conditions.

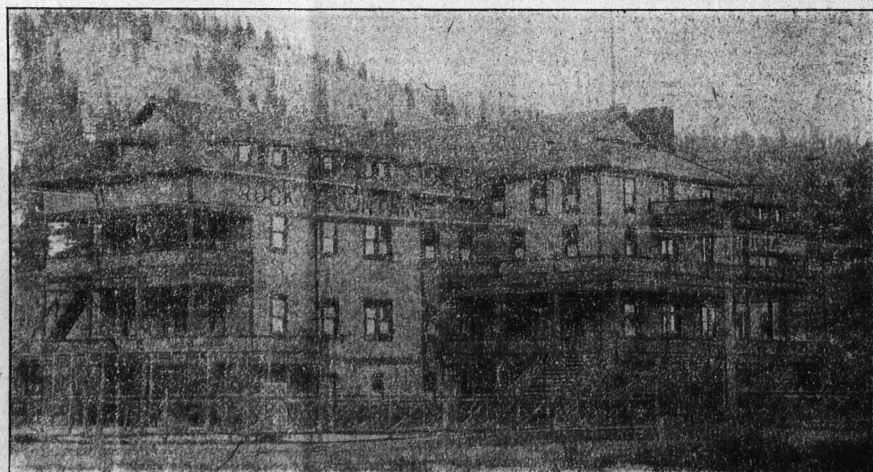

W. W. CURRIE, C.M.A.,
Deputy of the Minister of the Interior.
No. 1—Unpublished publication of this government will not be sold for \$100.

The Blairmore public school reopens on Tuesday next.

Rev. J. H. Hunter, accompanied by his father, James Hunter, of Nanton, left Calgary Thursday morning for Castanook, Quebec. Enroute Mr. Hunter, senior, will visit his sister, at Owen Sound, who is now ninety-five years of age.

Alphonse, Feneault, 42, sought by the Canadian police since March 1914, for alleged participation in a fight in which two Montreal policemen were killed and several wounded, was arrested in Detroit Sunday. The police said he admitted his identity, and that he will waive extradition.

Famous Resort Taken Over By Government as Hospital

Calgary, Aug. 28.—The military hospital's "command," the recently organized branch of the military hospital's command, has taken over the Rocky Mountain hotel at Frank as a sanatorium for soldiers afflicted with tubercular complaints.

The building, which is near the sulphur springs, is some little distance from the town and is situated in one of the most suburban parts of the province. It stands on an elevation of 4,000 feet and is well suited for the purpose intended.

It is completely equipped with both sulphur and ordinary water baths. Fine verandas open on three sides of the building and there is an excellent trout stream running in the rear. In a word, it has everything to commend it for the treatment of tubercular cases.

There is no sanatorium in Alberta and Saskatchewan, except the one at Mountain View. There are 25 returned soldiers there already and seven more coming immediately, and still others following later.

"The percentage of soldiers returning suffering more or less from this dread disease is rather under than over what one might expect considering the army that Canada has recruited," said Lieut.-Col. Alfred Thompson, in mentioning that the sanatorium had been taken over by the command. "If it is proposed to make the Rocky Mountain sanatorium the centre for the treatment of tubercular soldiers in the three prairie provinces, and when it is ready for occupation it will be one of the very best sanatoriums in Canada."

The hotel was occupied during the past winter by one of the Alberta regiments and as a result needs renovating somewhat. The contract is about to be let for this work.

Captain A. E. Porter, M.D., now of Edmonton, but formerly of Calgary, will be in charge of the institution. Captain Porter has had an extensive experience in the practice of his profession, and is a very competent man. The sanatorium will, of course, be under Major Thompson's command, and who, as such, will have all branches of the work under his administration in this district. Lieut.-Col. Alfred Thompson, the medical superior of hospitals under the military hospital's command, who put the deal through, is quite satisfied that the new sanatorium will come up to the best expectations. The sanatorium has been operated by the Franco-Canadian Colonies, until recently.
